# First Steps in LaTeX

Are you in a hurry? A friend received a letter from the American Mathematical Society (AMS) informing him that his paper had been accepted for publication in the Proceedings of the AMS. If he submitted it as a  $\text{\LaTeX}$  document, it would be published in 20 weeks—any other format would take almost a year before the appearance in print of the article. The friend had  $\text{\LaTeX}$  installed on his computer on Friday, borrowed the manuscript of this book, and mailed a  $\text{\LaTeX}$  version of his article to the AMS on Monday. *First Steps in  $\text{\LaTeX}$*  is for the mathematician, physicist, engineer, scientist, or technical typist who needs to quickly learn how to write and typeset articles containing mathematical formulas. A quick introduction to  $\text{\TeX}$  and the AMS enhancements is provided so that you will be ready to prepare your first article (such as the sample articles on pages 53–54 and 67–69) in only a few hours. Specific topics can be found in the table of contents, the Quick Finder, or the index. While the index is  $\text{\TeX}$ -oriented, the Quick Finder lists the main topics using terminology common to wordprocessing applications. For example, to find out how to italicize text, look under *italics* in the Quick Finder. Setting the stage Watch someone type a mathematical article in  $\text{\LaTeX}$ . You will see how to • Type the document using a text editor to create a  $\text{\TeX}$  source file.
