Complementary and Alternative Approaches to Biomedicine

- **Proceedings of the International Symposium on Complementary and Alternative Medicine, this title provide an international perspective on new approaches to healing.**
- **This book should appeal to a wide range of individuals in clinical medicine and basic science, including fields such as psychiatry, neurology, neuroscience, microbiology, pharmacology, nutrition, molecular biology, and immunology.**

WHAT HAPPENED IN KANAZAWA? THE BIRTH OF eCAM This book contains the proceedings of the International Symposium on Complementary and Alternative Medicine, (CAM) which was convened in Kanazawa Japan, November 8-10, 2002. The participants were mainly from Japan, USA, China, France, England, Germany, Taiwan, and India. The world of western medicine is gradually opening its doors to new ways of approaching healing. Since many of these approaches began centuries and even millennia ago in Asia, it was entirely appropriate to open our symposium in Kanazawa, a beautiful, traditional city located on the Sea of Japan. Experts from Asia, Europe and the United States gathered together for true discussions on complementary and alternative medicine and its role developing all over the world. As scientists, we listened to historical perspectives from India, China and Japan, where CAM is still being practiced as it has been for centuries. It is well to mention at the outset that this book will cover a rapidly growing field that has strong advocates but others who are less than enthusiastic. This should be evident by the presentation of chapters that aim to significantly dispel some of the criticisms of pseudoscience and myth that often surround the discipline. It is our purpose to present high quality peer reviewed chapters.
