## Business and Management : Operation Research/Decision Theory

Huber, R. (Ed.)

# Systems Analysis and Modeling in Defense

## Development, Trends, and Issues

This book contains the proceedings of an international symposium devoted to Modeling and Analysis of Defense Processes in the context of land/air warfare. It was sponsored by Panel VII (on Defense Applications of Operational Research) of NATO's Defense Research Group (DRG) and took place 27-29 July 1982 at NATO headquarters in Brussels. Except perhaps for the Theater-Level Gaming and Analysis Workshop, sponsored by the Office of United States Naval Research in 1977, this symposium was the first international scientific meeting on Operations Research/Systems Analysis in the area of land/air warfare since the conference on Modeling Land Battle Systems 2 for Military Planning sponsored by NATO's Special Programme Panel on Systems Science in 1974. That conference dealt primarily with modeling small unit (company, battalion) engagements and, to a lesser extent, large unit (corps, theater) campaigns with principal emphasis on attrition processes and movement in combat. It was considered as rather successful in that it revealed the state-of-the-art around 1972 and identified problem areas and promising approaches for future developments. With regard to foreign attendance, this workshop was largely limited to participants from the United Kingdom and the Federal Republic of Germany (see L.J. Low: Theater-Level Gaming and Analysis Workshop for Force Planning, Vol II-Summary, Discussion of Issues and Requirements for Research, SRI-Report, May, 1981).
