## Criminology and Criminal Justice : Criminology and Criminal Justice, general

Weisburd, D., Farrington, D.P., Gill, C. (Eds.)

# What Works in Crime Prevention and Rehabilitation

## Lessons from Systematic Reviews

- Presents a comprehensive stock-taking of what has been learned by over a decade of systematic reviews in Criminology
- Editors and authors are pioneers in bringing systematic reviews of evidence-based research to the study of crime prevention and reduction
- Summarizes and codifies results of systematic reviews on policing, social and situational interventions, corrections, drug abuse, deterrence, risk factors for crime, cost-benefit analysis, and policy applications

This ambitious volume brings together and assesses all major systematic reviews of the effectiveness of criminological interventions, to draw broad conclusions about what works in policing, corrections, developmental prevention, situational prevention, drug abuse treatments, sentencing and deterrence, and communities. Systematic reviews aim to minimize any possible bias in drawing conclusions by stating explicit criteria for inclusion and exclusion of studies, by conducting extensive and wide-ranging searches for possibly eligible studies, and by making all stages of the review explicit and transparent so that the methods can be checked and replicated. Over a decade ago, a concerted effort was made by members of the criminology community, including the Editors and contributors of this volume, to bring the practice of systematic reviews to the study of Criminology, providing replicable, evidence-based data to answer key questions about the study of crime causation, detection, and prevention. Now, the pioneers in this effort present a comprehensive stock-taking of what has been learned in the past decade of systematic reviews in criminology.
