# Digital Document Processing

Major Directions and Recent Advances

Series: Advances in Computer Vision and Pattern Recognition

- All the major topics in the field of Digital Document Processing covered in a single volume
- Written by the pioneers and some of the most famous scientists in the field

In this book, all the major and frontier topics in the field of document analysis are brought together into a single volume creating a unique reference source. Highlights include: - Document structure analysis followed by OCR of Japanese, Tibetan and Indian printed scripts. - Online and offline handwritten text recognition approaches; - Japanese postal and Arabic check processing; - Document image quality modelling, mathematical expression recognition, graphics recognition, document information retrieval, super resolution text, metadata extraction in digital library; - Biometric and forensic aspects: individuality of handwriting detection; - Web document analysis, text and hypertext mining and bank check data mining. Containing chapters written by some of the most eminent researchers active in this field, this book can serve as a handbook for the research scholar as well as a supporting book for advanced graduate students interested in document processing or image analysis.
