Political Communication in Britain

Campaigning, Media and Polling in the 2017 General Election

- Is the 10th volume in the Political Communications longstanding series launched in 1979
- Provides practitioner as well as academic commentaries from those responsible for organising, reporting and monitoring the 2017 Election
- Seeks to understand the relationships between the parties, media and voting public

Political Communication in Britain is a now established series of nine books, the first of which appeared in the aftermath of the 1979 General Election. This book follows the structure of previous volumes and features commentaries and assessments from the pollsters who monitored voter opinion during the 2017 General Election. It also includes chapters from party strategists responsible for devising and executing the rival campaigns. Furthermore, contributions from journalists offer a media perspective on the campaign. The remainder of the book consists of academic material designed to complement and augment the aforementioned professionals' chapters. Here the focus is on the major dynamics of political communication, specifically the roles of the press, television, advertising, internet and other such phenomena during the 2017 Snap Election.
