Boughdiri, M., Bádenas, B., Selden, P., Jaillard, E., Bengtson, P., Granier, B.R.C. (Eds.)

Paleobiodiversity and Tectono-Sedimentary Records in the Mediterranean Tethys and Related Eastern Areas

Proceedings of the 1st Springer Conference of the Arabian Journal of
Geosciences (CAJG-1), Tunisia 2018

- Enhances the understanding of ancient and recent sedimentary processes, controlling factors and products
- Provides new insights on latest fossil record, distribution and use in biostratigraphy
- Presents several case studies regarding biosphere-geosphere interactions
- Discusses the state-of-the-art models related to paleoenvironment reconstruction
- Focuses mainly on studies from the Mediterranean and MENA region

This edited volume contains the best papers accepted for presentation during the 1st Springer Conference of the Arabian Journal of Geosciences (CAJG-1), Tunisia 2018. The volume shares the latest results from paleontological, biostratigraphic and sedimentological studies by experienced researchers mainly from research institutes in the Mediterranean and Middle East. Main topics include: paleontology, biostratigraphy, sedimentology, paleoclimatology and geomorphology. Some new insights are given on paleobiodiversity and major biological tools for biostratigraphy, patterns, mechanisms and processes of meso-cenozoic sedimentation in the Mediterranean and Middle East. In particular, case studies are included to highlight the major controlling factors of Tethyan biosphere-geosphere interactions as inferred from the Mediterranean and Middle East regions.
