Eric Drummond and his Legacies

The League of Nations and the Beginnings of Global Governance

Series: Understanding Governance

- Argues that the present-day organizations of global governance are powerfully influenced by their early origins
- Examines how the character of Eric Drummond influenced the establishment of the International Civil Service, the glue that holds the multilateral system together
- Appeals to those who follow international affairs and twentieth century history; academics and students of global organizations, international relations and global governance; as well as those working, or wishing to work, in international organizations

This book shows how the first institution of global governance was conceived and operated. It provides a new assessment of its architect, Eric Drummond, the first Secretary-General of the League of Nations, appointed a century ago. The authors conclude that he stands in the front rank of the 12 men who have occupied the post of Secretary-General of the League or its successor, the UN. Part 1 describes his character and leadership. His influence in shaping the International Civil Service, the 'beating heart' of the League, is the subject of Part 2, which also shows how the young staff he appointed responded with imagination and creativity to the political, economic and social problems that followed World War I. Part 3 shows the influence of these early origins on today's global organizations and the large scale absorption of League policies, programmes, practices and staff into the UN and its Specialized Agencies.
