ICT for a Better Life and a Better World

The Impact of Information and Communication Technologies on Organizations and Society

- Presents a comprehensive scientific approach in studying and assessing the impact of ICTs on development
- Provides an approach especially well suited to developing countries
- Supplies an in-vivo technological analysis involving a number of developing countries

This book focuses on the impact of information and communication technologies (ICTs) on organizations and society as a whole. Specifically, it examines how such technologies improve our lives and facilitate our work. A main aspect explored is how actors understand the potential of ICTs to support organizational activities and hence, how they adopt and adapt these technologies to achieve their goals. The book collects papers on various areas of organizational strategy, e.g. new business models, competitive strategies, knowledge management and more. The main areas dealt with are new technologies for a better life, innovations for e-government, and technologies enhancing enterprise modeling. In addition, the book addresses how organizations impact society through sustainable development and social responsibility, and how ICTs employ social media networks in the process of value co-creation.
