# Taxonomy, Genomics and Ecophysiology of Hydrocarbon-Degrading Microbes

Series: Handbook of Hydrocarbon and Lipid Microbiology

- Comprehensive, authoritative information about the taxonomy, genomics and ecophysiology of hydrocarbon-degrading microorganisms
- Particular attention is given to the the global consequences of microbes utilising hydrocarbons
- Experts of the field explore aerobic hydrocarbon-degrading bacteria, as well as anerobic hydrocarbon-degrading bacteria

This book provides comprehensive, authoritative descriptions of the microbes involved in cleaning up oil spills and degrading climate-altering hydrocarbons such as methane, and has detailed discussions about the taxonomy, ecology, genomics, physiology and global significance of these hydrocarbon-degrading microbes.
