Statistics : Statistics for Life Sciences, Medicine, Health Sciences

Zhang, L., Chen, D.-G.(., Jiang, H., Li, G., Quan, H. (Eds.)

Contemporary Biostatistics with Biopharmaceutical Applications

- Presents current research in biostatistics with emphasis on biopharmaceutical applications
- Features contributions from experts in biopharmaceuticals and regulatory government agencies
- Features timely topics such as biostatistical methods, statistical genetics, and regulatory issues in biopharmaceuticals
- Presents timely discussions on methodological developments and real-world application
- Provides access to the datasets and computer programs publicly so the model development can be easily replicated

This edited volume presents current research in biostatistics with emphasis on biopharmaceutical applications. Featuring contributions presented at the 2017 ICSA Applied Statistics Symposium held in Chicago, IL on June 25 to 28, 2017, this book explores timely topics that have a high potential impact on statistical methodology and future research in biostatistics and biopharmaceuticals. The theme of this conference was Statistics for a New Generation: Challenges and Opportunities, in recognition of the advent of a new generation of statisticians. The conference attracted statisticians working in academia, government, and industry; domestic and international statisticians. From the conference, the editors selected 28 high-quality presentations and invited the speakers to prepare full chapters for this book. These contributions are divided into four parts: Part I Biostatistical Methodology, Part II Statistical Genetics and Bioinformatics, Part III Regulatory Statistics, and Part IV Biopharmaceutical Research and Applications. Featuring contributions on topics such as statistics in genetics, bioinformatics, biostatistical methodology, and statistical computing, this book is beneficial to researchers, academics, practitioners and policy makers in biostatistics and biopharmaceuticals.
