Geospatial Technology

Application in Water Resources Management

- Provides seven extended case studies discussing the latest developments in geospatial technologies application for water resources management
- Presents unique multidisciplinary approaches to address water related natural risks
- Combines innovative ideas and techniques from different fields for sustainable water resources management

This book aims to exchange and share the experiences and research results on the geospatial technology applied in water resources management. It will present the most recent innovations, trends, challenges encountered and the solutions adopted in the area of geospatial technology. It will be beneficial for academicians, scientists, meteorologists, and consultants working in the field of water resources management.
