Hendrik W. Ohnesorge

Soft Power

The Forces of Attraction in International Relations

Series: Global Power Shift

- Offers a comprehensive conceptual taxonomy of soft power in international relations
- Develops a methodological roadmap for the empirical study of soft power
- Positions and discusses soft power in current debates on power and global power shifts.

This book explores the phenomenon of soft power in international relations. In the context of current discourses on power and global power shifts, it puts forward a comprehensive taxonomy of soft power and outlines a methodological roadmap for its empirical study. To that end, the book classifies soft power into distinct components - resources, instruments, reception, and outcomes - and identifies relevant indicators for each of these categories. Moreover, the book integrates previously neglected aspects into the concept of soft power, including the significance of (political) personalities. A broad range of historical examples is drawn upon to illustrate the effects of soft power in international relations in an innovative and analytically differentiated way. A central methodological contribution of this book consists in highlighting the value of comparative-historical analysis (CHA) as a promising approach for empirical analyses of the soft power of different actors on the international stage. By introducing a comprehensive taxonomy of soft power, the book offers an innovative and substantiated perspective on a pivotal phenomenon in today's international relations. As the forces of attraction in world politics continue to gain in importance, it provides a valuable asset for a broad readership. "In this important and thoughtful book, Hendrik Ohnesorge explains and advances our knowledge of the ways that soft power, public diplomacy, and charismatic personal diplomacy are shaping the international relations of our global information age." Joseph S. Nye, Jr., Harvard University and author of *The Future of Power*
