Advanced Intelligent Systems for Sustainable Development (AI2SD'2019)

Volume 6 - Advanced Intelligent Systems for Networks and Systems

- **Presents the latest research and applications in the area of advanced intelligent systems for sustainable development**
- **Includes the proceedings of the Advanced Intelligent Systems for Sustainable Development (AI2SD'2019) held in Marrakech, Morocco, from 8 to 11 July 2019**
- **Discusses applications of intelligent systems**

This proceedings book presents extended versions of papers on advanced intelligent systems for networks and system selected from the second edition of the International Conference on Advanced Intelligent Systems for Sustainable Development (AI2SD'2019), which was held on 8–11 July 2019 in Marrakech, Morocco. The book explores a number of aspects of networks and systems design issues, and focuses on the latest research developments in a number of areas, including various aspects of modern networking such as smart networked systems, network protocols and performance, security and privacy, mobile and wireless systems, Internet of things, artificial intelligence and expert systems, and cloud computing, as well as enabling technologies. The book also examines the area of intelligence, comprehensively examining a range of important topics like intelligent collaborative systems for work and learning, security, organization, management and autonomic computing for intelligent networking and collaborative systems, wireless and sensor systems for intelligent networking and collaborative systems, data mining and knowledge management for intelligent networking and collaborative systems, data for Internet of things, and cloud computing.
