# Geometric Methods in Physics XXXVII

**Workshop and Summer School, Biaowiewa, Poland, 2018**

The book consists of articles based on the XXXVII Biaowiewa Workshop on Geometric Methods in Physics, 2018. The series of Biaowiewa workshops, attended by a community of experts at the crossroads of mathematics and physics, is a major annual event in the field. This edition of the workshop featured a special session dedicated to Professor Daniel Sternheimer on the occasion of his 80th birthday. The previously unpublished papers present cutting-edge current research, typically grounded in geometry and analysis, with applications to classical and quantum physics. For the past seven years, the Biaowiewa Workshops have been complemented by a School on Geometry and Physics comprising a series of advanced lectures for graduate students and early-career researchers. The book also includes abstracts of the five lecture series that were given at the seventh school.
