Business and Management: Entrepreneurship

Shi, Henry X

Entrepreneurship in Family Business

Cases from China

- · Presents a critical and operational approach to the essence of family business
- Provides a detailed account of the evolution of entrepreneurship in China's private economy
- · Studies authentic cases of second-generation family businesses from China

This book presents an excellent analysis of how a family business is different from other forms of organization and especially its peculiarities in relation to entrepreneurship. Focusing on small and medium-sized second-generation Chinese family businesses this book provides an indepth analysis on the relationship between the firms' family attributes — or "familiness" as conceptualized in this book — and entrepreneurial processes, which leads to different outcomes. Eight cases from China are presented in this book and a dual-level approach is proposed for research on entrepreneurship in family businesses, emphasising both firm processes and the role of individual owner-managers. Readers will also find several useful policy and practice-oriented perspectives in this book.
