Sobecki, J., Boonjing, V., Chittayasothorn, S. (Eds.), Wroclaw University of Technology, Wroclaw, Poland

Advanced Approaches to Intelligent Information and Database Systems

- Latest research on Intelligent Information and Database Systems
- This book is inspired by the 6th Asian Conference on Intelligent Information and Database Systems held April 7 - 9, 2014, Bangkok, Thailand
- Recent results on technologies and applications of intelligent information and database systems

This book consists of 35 chapters presenting different theoretical and practical aspects of Intelligent Information and Database Systems. Nowadays both Intelligent and Database Systems are applied in most of the areas of human activities which necessitates further research in these areas. In this book various interesting issues related to the intelligent information models and methods as well as their advanced applications, database systems applications, data models and their analysis and digital multimedia methods and applications are presented and discussed both from the practical and theoretical points of view. The book is organized in four parts devoted to intelligent systems models and methods, intelligent systems advanced applications, database systems methods and applications and multimedia systems methods and applications. The book will be interesting for practitioners and researchers, especially graduate and PhD students of information technology and computer science, as well more experienced academics and specialists interested in developing and verification of intelligent information, database and multimedia systems models, methods and applications. The readers of this volume are enabled to find many inspiring ideas and motivating practical examples that will help them in the current and future work.
