Yager, R.R., Reformat, M.Z., Alajlan, N. (Eds.)

Intelligent Methods for Cyber Warfare

- Recent research on Soft Computing in Cyber warfare
- Presents Soft and Intelligent Computing Technologies for Cyber warfare
- Written by experts in the field

Cyberwarfare has become an important concern for governmental agencies as well businesses of various types. This timely volume, with contributions from some of the internationally recognized, leaders in the field, gives readers a glimpse of the new and emerging ways that Computational Intelligence and Machine Learning methods can be applied to address problems related to cyberwarfare. The book includes a number of chapters that can be conceptually divided into three topics: chapters describing different data analysis methodologies with their applications to cyberwarfare, chapters presenting a number of intrusion detection approaches, and chapters dedicated to analysis of possible cyber attacks and their impact. The book provides the readers with a variety of methods and techniques, based on computational intelligence, which can be applied to the broad domain of cyberwarfare.
