The Impact of Pen and Touch Technology on Education

Series: Human-Computer Interaction Series

- Presents several perspectives on the use of pen and tablet based technologies on education
- Introduces and evaluates new and emerging technologies invented for classroom use
- Provides first-hand perspectives of educators' experiences with pen and tablet technologies
- Explores the potential of proposed systems and works in progress, which give insight into the future of pen and touch technologies for education

This book presents perspectives for and by teachers, school and university administrators and educational researchers regarding the great impact pen and tablet technology can have on classrooms and education. presents three distinctly valuable threads of research: Emerging technologies and cutting-edge software invented by researchers and evaluated through real classroom deployments. First-hand perspectives of instructors and administrators who actively implement pen or tablet technologies in their classrooms. Up-and-coming systems that provide insight into the future of pen, touch, and sketch recognition technologies in the classrooms and the curriculums of tomorrow. The Impact of Pen and Touch Technology on Education is an essential read for educators who wish get to grips with ink-based computing and bring their teaching methods into the twenty-first century, as well as for researchers in the areas of education, human-computer interaction and intelligent systems for pedagogical advancement.
