Legal Aspects of Sustainable Development

Horizontal and Sectorial Policy Issues

- Offers cross-cutting analyses of legal aspects of sustainable development
- Addresses the interrelations and interdependences between sustainable development and law
- Uses case studies to explore inter linkages of vertical and horizontal policies and multiagency involvement

This book addresses legal aspects of sustainable development and offers the latest thinking on a wide range of current themes. By taking a cross-cutting approach, it adds considerably to the exploration of this emerging scientific field. Twenty-nine original contributions present innovative thoughts and replicable ideas from this exciting, new area, which will be of value to practitioners and researchers alike. These contributions are allocated into a horizontal and sectorial part. The section covering horizontal policies has five sub-parts: 1) general aspects; 2) human and intellectual property rights; 3) communication and social enterprise governance; 4) public participation and 5) assessment tools. The second part on sectorial policies also has five sub-parts: 1) forest and water management; 2) renewable energy; 3) cities, waste and material management; 4) biodiversity, nature conservation, oceans and spatial planning and 5) agriculture and rural policy. It offers a multifaceted discussion of sustainable development and law by authors from five continents and from both the public and the private sectors. This selection guarantees a broad view that presents the more theoretical arguments from the academic as well as the practical perspective. Furthermore, the authorship includes senior, highly experienced academics and practitioners as well as those at the start of their career. This ensures thoughtful expansions of established theories as well as the emergence of innovative ideas. Moreover, the ten sub-parts bring together likeminded thoughts, resulting in an exchange of different viewpoints on a similar theme. This allows the readers to concentrate on individual chapters, while at the same time discovering a variety of thoughts and ideas.
