Garrison, Ervan

Techniques in Archaeological Geology

- 2nd edition includes paleoecology, paleoclimate and studies about ancient cultures
- Integrates new data analysis of specific geologic methods
- Includes many color illustrations and "inset examples"

This 2nd edition is a survey level review of key areas of archaeological geology /geoarchaeology. Principal subject areas include: historical principles; archaeological and geomorphic surfaces and landforms types; sediments and sediment analytic methods; archaeological stony materials - petrographic and mineralogic attributes; ceramic materials - mineralogic composition and analytic methods; geochemical methods useful in archaeological geology - studies of materials; commonly used geochronological methods for archaeological geology. Contributions to paleoecology, paleoclimate and ancient cultures as well as multivariate ICP and EDX data are now included.
