Critical Approaches to Education Policy Analysis

Moving Beyond Tradition

Series: Education, Equity, Economy

- Diverse theoretical and methodological approaches to critical policy analysis in educational policy and educational leadership
- Insights into the use of critical theoretical perspectives in policy scholarship
- A comprehensive approach to critical educational policy with a focus on contemporary issues

This volume informs the growing number of educational policy scholars on the use of critical theoretical frameworks in their analyses. It offers insights on which theories are appropriate within the area of critical educational policy research and how theory and method interact and are applied in critical policy analyses. Highlighting how different critical theoretical frameworks are used in educational policy research to reshape and redefine the way scholars approach the field, the volume offers work by emerging and senior scholars in the field of educational policy who apply critical frameworks to their research. The chapters examine a wide range of current educational policy topics through different critical theoretical lenses, including critical race theory, critical discourse analysis, postmodernism, feminist poststructuralism, critical theories related to LGBTQ issues, and advocacy approaches.
