Subash Chandra Gupta, Sahdeo Prasad, Bharat B. Aggarwal (Eds.)

Drug Discovery from Mother Nature

Series: **Advances in Experimental Medicine and Biology**

- Provides an overview of anti-inflammatory nutraceuticals
- Discusses their role in prevention and therapy of various chronic diseases
- Offers a valuable resource for a wide readership, especially researchers, clinicians and students

Second comprehensive volume focuses on anti-inflammatory nutraceuticals and their role in prevention and therapy of various chronic diseases. Food and drug administration (FDA) approved drugs such as steroids, non-steroidal anti-inflammatory drugs (NSAIDs), statins and metformin have been shown to modulate inflammatory pathways, but their long-term intake has been associated with numerous side effects. Thus dietary agents which can modulate inflammatory pathways in humans, are likely to exhibit enormous potential. Leading experts describe the latest results of anti-inflammatory nutraceuticals and their role in prevention and therapy of various chronic diseases.
