Linguistics : Theoretical Linguistics

Gotzner, Nicole

Alternative Sets in Language Processing

How Focus Alternatives are Represented in the Mind

- Examines linguistic alternatives, which play a key role in various linguistic phenomena
- Takes an interdisciplinary approach
- Sheds new light on long-standing issues in semantics and pragmatics
- Provides key insights for psycholinguists, semanticists and pragmaticists
- Employs a variety of psycholinguistic methods to test mental representations

This book presents a novel experimental approach to investigating the mental representation of linguistic alternatives. Combining theoretical and psycholinguistic questions concerning the nature of alternative sets, it sheds new light on the theory of focus and the cognitive mechanisms underlying the processing of alternatives. In a series of language comprehension experiments, the author shows that intonational focus and focus particles such as 'only' shape the representation of alternatives in a listener's mind in a fundamental way. This book is relevant to researchers interested in semantics, pragmatics, language processing and memory.
