Medicine : Urology

Goonewardene, Sanchia, Persad, Raj (Eds.), Princess Alexandra Hospital, Harlow, UK

# Surgical Procedures for Core Urology Trainees

- Each chapter will target a specific procedure, including which equipment is required and the anatomy involved in the procedure
- Surgical tips and tricks of each procedure will be given, as well as an explanation of what experts would do to deal with difficult situations
- The chapters will include photographic and illustrative material to give trainees further insight.

This book aims to give junior urologists in training an idea of how to assemble equipment required for core urology procedures on a global level. This includes what to do pre-operatively, surgical indications and techniques, what to do post operatively, and complications that may occur. It can be daunting taking up a post as a surgical trainee despite supervision of seniors. This book will help in instilling competence and confidence in the trainee with step by step descriptions of key specialty procedures and their variations. Important practical clinical anatomy will be illustrated as well as an emphasis on safety.
