Education : Sociology of Education

Hicks Peterson, Tessa

# Student Development and Social Justice

Critical Learning, Radical Healing, and Community Engagement

- Explores ideas of personal transformation, social change, intercultural understanding, and critical community engagement in higher education
- Examines student pathways to “eudaimonic well-being” that results from finding purpose, realizing potential, and engaging with self and the world
- Uses logic models to draw parallels between student development and community engagement

This book weaves together critical components of student development and community building for social justice to prepare students to engage effectively in community-campus partnerships for social change. The author combines diverse theoretical models such as critical pedagogy, asset-based community development, and healing justice with lessons from programs promoting indigenous knowledge, decolonization, and mindfulness. Most importantly, this book links theory to practice, offering service-learning classroom activities, course and community partnership criteria, learning outcomes, and assessment rubrics. It speaks to students, faculty, administrators, and community members who are interested in utilizing community engagement as a vehicle for the development of students and communities towards wellbeing and social justice.
