

Klaus Groschner, Wolfgang F. Graier, Christoph Romanin (Eds.)

# Store-Operated Ca<sup>2+</sup> Entry (SOCE) Pathways

Emerging Signaling Concepts in Human (Patho)physiology

Series: Advances in Experimental Medicine and Biology

- Describes the role of SOCE pathways in health and disease
- Combines basic research with clinical aspects
- The second edition was updated with new discoveries in the field of structural biology, optogenetics and disease
- Introduces the most recent concepts of linkage between SOCE and mitochondrial Ca<sup>2+</sup> signaling
- Gives insight into the newly identified molecular structure of the STIM-Orai machinery at the atomic resolution level

2nd ed. 2017, XXIX, 645 p. 84 illus., 62 illus. in color. With online files/update.

This second edition of the book on Store-operated Ca<sup>2+</sup> Entry Pathways has been updated with the newest discoveries that emerged in the field within the last five years. The crystal structure of the Ca<sup>2+</sup> signaling core complex is described which adds to a new understanding of the molecular interactions involved. Each chapter has been revised and extended. The book retains its interdisciplinary approach and supplies biochemists, cell biologists and biophysicists as well as clinicians in immunology, neurology and cardiology with valuable information on Ca<sup>2+</sup> signaling mechanisms, functions, dysfunctions and their consequences.
