Springer Texts in Business and Economics

Economics : Microeconomics

Kolmar, Martin, Hoffmann, Magnus, University of St. Gallen, St. Gallen, Switzerland

Workbook for Principles of Microeconomics

- Includes an extensive and unique variety of questions and exercises for students of Principles of Microeconomics
- Features multiple-choice questions, calculation exercises and open case studies
- Open case studies will help readers apply the theories discussed in the textbook to real-world problems

This is the companion workbook for the textbook Principles of Microeconomics. Each chapter features a wide variety of exercises, ranging from basic multiple-choice questions to challenging mathematical problems and case study scenarios. The textbook pursues an integrative approach to modern microeconomics by critically reflecting on the main findings of economics from a philosophical standpoint and comparing them to approaches found in the social sciences. It adopts an institutional perspective to analyze the potential and limitations of different market types, and highlights implications for the design of the legal system and business practices throughout. In addition to traditional rational-choice models, important findings from behavioral economics and psychology are also presented.
