H. Pérez García, J. Alfonso-Cendón, L. Sánchez González, H. Quintián, E. Corchado (Eds.)

International Joint Conference SOCO'17-CISIS'17-ICEUTE'17 León, Spain, September 6-8, 2017, Proceeding

Series: Advances in Intelligent Systems and Computing

- Includes the latest research on soft computing models in industrial and environmental applications, computational intelligence in security for information systems, and European transnational education
- Provides the scientific outcomes of the International Joint Conference SOCO'17-CISIS'17-ICEUTE'17 held in León (Spain) in September 2017

This volume includes papers presented at SOCO 2017, CISIS 2017, and ICEUTE 2017, all conferences held in the beautiful and historic city of León (Spain) in September 2017. Soft computing represents a collection of computational techniques in machine learning, computer science, and some engineering disciplines, which investigate, simulate, and analyze highly complex issues and phenomena. These proceedings feature 48 papers from the 12th SOCO 2017, covering topics such as artificial intelligence and machine learning applied to health sciences; and soft computing methods in manufacturing and management systems. The book also presents 18 papers from the 10th CISIS 2017, which provided a platform for researchers from the fields of computational intelligence, information security, and data mining to meet and discuss the need for intelligent, flexible behavior by large, complex systems, especially in mission-critical domains.
