Salas, S., Barragán-Paladines, M.J., Chuenpagdee, R. (Eds.), Cinvestav Mérida, Mérida, Mexico

Viability and Sustainability of Small-Scale Fisheries in Latin America and The Caribbean

- Covers a variety of small-scale fisheries issues in different contexts, from Islands to the continent, offering a wide range of themes that are being discussed by government and non-governmental organizations
- Case studies offer lessons learned in terms of vulnerability concerns, market dynamics, social capital and institutional and legal frameworks of SSF, which is a priority for many countries in LAC and worldwide; contributing therefore to the implementation of the SSF Guidelines in the region
- Contributors to the book are experts and specialists from different disciplines within the Latin America and the Caribbean region who have an extensive experience working in the region

One of the main goals in fisheries governance is to promote viability and sustainability in small-scale fishing communities. This is not an easy task given external and internal pressure, including environmental change and competition with other economic sectors searching for development in the coastal region. A comprehensive understanding of small-scale fisheries in their own context, and from a regional perspective, is an important step in supporting the implementation of the Voluntary Guidelines on Securing Sustainable Small-Scale Fisheries (SSF Guidelines). This book contributes to the global effort by offering knowledge, insights and lessons about small-scale fisheries in Latin America and the Caribbean. The 20 case studies included in the book make explicit the various dimensions that are intrinsic to small-scale fisheries in the region, and identify conditions and situations that affect the wellbeing of fishing communities.
