Energy : Renewable and Green Energy

Nižetić, Sandro, Papadopoulos, Agis (Eds.), University of Split, Split, Croatia

The Role of Exergy in Energy and the Environment

- Contains examples of exergy and energy analysis in industrial applications
- Analyzes the economic feasibility of different cases within engineering practice based upon exergy analysis
- Contains a variety of case studies from the exergy, energy and environmental fields

This book is devoted to the analysis and applications of energy, exergy, and environmental issues in all sectors of the economy, including industrial processes, transportation, buildings, and services. Energy sources and technologies considered are hydrocarbons, wind and solar energy, fuel cells, as well as thermal and electrical storage. This book provides theoretical insights, along with state-of-the-art case studies and examples and will appeal to the academic community, but also to energy and environmental professionals and decision makers.
