History : History of Germany and Central Europe

Lüthi, Barbara, Skenderovic, Damir (Eds.)

Switzerland and Migration

Historical and Current Perspectives on a Changing Landscape

- Explores the relationship between migration, power and agency in one of the countries with the highest migrant population in Europe
- Brings together historians, sociologists, anthropologists and cultural studies scholars to offer new perspectives on historical experiences and legacies of migration
- Takes a transnational and comparative approach to migration history

This book explores the history of migration in Switzerland from the late nineteenth century to the present day. It brings together recent scholarship on Switzerland in the field of cultural and migration studies, as well as migration history, and combines various research approaches from postcolonial studies, transnational studies, border studies, and history of knowledge. Since the late nineteenth century, Switzerland has gradually transformed into a migration society, becoming one of the countries in Europe with the highest percentage of migrant population. While migration has become one of most contentious issues in Swiss public and political debates, the volume also shows how migrants have developed various strategies to deal with the country's discriminatory policies and distinct institutional settings. The authors of the volume convincingly challenge the view that Switzerland still does not represent a migration (or even post-migrant) society and substantially contributes to the long overdue acknowledgement of Switzerland in migration history and studies at the international level.
