New Frontiers of Biostatistics and Bioinformatics

Series: ICSA Book Series in Statistics

- Features 22 contributions from the 5th Workshop on Biostatistics and Bioinformatics
- Features contributions on topics such as fMRI data analysis, survival analysis, longitudinal data analysis, Bayesian analysis, casual inference, and high dimensional data analysis
- Presents new advances in biostatistical methods and applications of real data

This book is comprised of presentations delivered at the 5th Workshop on Biostatistics and Bioinformatics held in Atlanta on May 5-7, 2017. Featuring twenty-two selected papers from the workshop, this book showcases the most current advances in the field, presenting new methods, theories, and case applications at the frontiers of biostatistics, bioinformatics, and interdisciplinary areas. Biostatistics and bioinformatics have been playing a key role in statistics and other scientific research fields in recent years. The goal of the 5th Workshop on Biostatistics and Bioinformatics was to stimulate research, foster interaction among researchers in field, and offer opportunities for learning and facilitating research collaborations in the era of big data. The resulting volume offers timely insights for researchers, students, and industry practitioners.
