

Hellmut G. Karge, Jens Weitkamp (Eds.)

Structures and Structure Determination

Series: Molecular Sieves

- The first handbook on zeolites and other microporous materials
- Up-to-date, highly sophisticated collection of information for those who have already been dealing with zeolites in industry or at academic institutions
- A guide to newcomers into molecular sieves science experimental data

Molecular Sieves - Science and Technology will cover, in a comprehensive manner, the science and technology of zeolites and all related microporous and mesoporous materials. Authored by renowned experts, the contributions will be grouped together topically in such a way that each volume of the book series will be dealing with a specific sub-field. Volume 2 covers both the description of the various, complementary techniques for structure determination of microporous and mesoporous matter and their applications illustrated by a large number of pertinent examples. It also deals with general aspects of structures and structure distortions of microporous materials. In summary, Volume 2 provides the researchers in the field of zeolites and related materials with the indispensable knowledge of the great potential of modern methods for structure analysis.
