Principles and Practice of Constraint Programming - CP 2007

13th International Conference, CP 2007, Providence, RI, USA, September 25-29, 2007, Proceedings

The 13th International Conference on Principles and Practice of Constraint Programming (CP 2007) was held in Providence, RI, USA, September 23–27, 2007, in conjunction with the International Conference on Automated Planning and Scheduling (ICAPS). Held annually, the CP conference series is the premier international conference on constraint programming. The conference focuses on all aspects of computing with constraints. The CP conference series is organized by the Association for Constraint Programming (ACP). Information about the conferences in the series can be found on the Web at <http://www.cs.ualberta.ca/~ai/cp/>. Information about ACP can be found at <http://www.a4cp.org/>. CP 2007 launched two calls for contributions: a call for research papers, describing novel contributions in the field, and a call for application papers, describing applications of constraint technology in the industrial world. The research track received 143 submissions and the application track received 22 submissions. Research papers were reviewed under a double-blind scheme. They received three reviews that the authors had the opportunity to see and to react to before the papers and their reviews were discussed extensively by the members of the Program Committee. Application papers were reviewed by a separate Application Committee. The Program Committee and the Application Committee then selected 43 research papers and 9 application papers to be published in full in the proceedings, and an additional 14 research papers to be published as short papers. The full papers were presented at the conference in two parallel tracks and the short papers were presented in a poster session.
