# Recent Advances in Intrusion Detection

11th International Symposium, RAID 2008, Cambridge, MA, USA,  
September 15-17, 2008, Proceedings

Series: Security and Cryptology

On behalf of the Program Committee, it is our pleasure to present the proceedings of the 11th International Symposium on Recent Advances in Intrusion Detection (RAID 2008), which took place in Cambridge, Massachusetts, USA on September 15–17. The symposium brought together leading researchers and practitioners from academia, government and industry to discuss intrusion detection research and practice. There were six main sessions presenting full-edged research papers (rootkit prevention, malware detection and prevention, high performance intrusion and evasion, web application testing and evasion, alert correlation and worm detection, and anomaly detection and network traffic analysis), a session of post-emerging research areas and case studies, and two panel discussions ("Government Investments: Successes, Failures and the Future" and "Life after Antivirus - What Does the Future Hold?"). The RAID 2008 Program Committee received 80 paper submissions from all over the world. All submissions were carefully reviewed by at least three independent reviewers on the basis of space, topic, technical assessment, and overall balance. Final selection took place at the Program Committee meeting on May 23rd in Cambridge, MA. Twenty papers were selected for presentation and publication in the conference proceedings, and four papers were recommended for resubmission as poster presentations. As a new feature this year, the symposium accepted submissions for poster presentations, which have been published as extended abstracts, reporting gear-stage research, demonstration of applications, or case studies. Thirty-nine posters were submitted for a numerical review by an independent, three-person subcommittee of the Program Committee based on novelty, description, and evaluation. The subcommittee chose to recommend the acceptance of 16 of these posters for presentation and publication.
