Financial Cryptography and Data Security

FC 2010 Workshops, WLC, RLCPS, and WECSR, Tenerife, Canary Islands, Spain, January 25-28, 2010, Revised Selected Papers

• State-of-the-art research Fast-track conference proceedings Unique visibility

This volume contains the workshop proceedings of the accompanying workshops of the 14th Financial Cryptography and Data Security International Conference 2010, held on Tenerife, Canary Islands, Spain, January 25-28, 2010. Financial Cryptography and Data Security is a major international forum for research, advanced development, education, exploration, and debate regarding information assurance, with a specific focus on commercial contexts. The conference covers all aspects of securing transactions and systems and especially encourages original work focusing on both fundamental and applied real-world deployments on all aspects surrounding commerce security. Three workshops were co-located with FC 2010: the Workshop on Real-Life Cryptographic Protocols and Standardization (RLCPS), the Workshop on Ethics in Computer Security Research (WECSR), and the Workshop on Lightweight Cryptography for Resource-Constrained Devices (WLC). Intimate and colorful by tradition, the high-quality program was not the only attraction of FC. In the past, FC conferences have been held in highly research-synergistic locations such as Tobago, Anguilla, Dominica, Key West, Guadelupe, Bermuda, the Grand Cayman, and Cozumel Mexico. 2010 was the first year that the conference was held on European soil, in the Spanish Canary Islands, in Atlantic waters, a few miles across Morocco. Over 100 researchers from more than 20 countries were in attendance.
