Dynamics of Cross-Border Flow-Performance Relationships

The Case of European Equity (UCITS) Funds

- Study in the field of economics

In order to measure the dynamics of flow-performance relationships for a multi-domicile sample, Simon Weiler applies existing flow-performance research methods to a broad set of European equity (UCITS) funds and proves that major findings (performance-chasing behaviour and a convex flow-performance relationship) also hold true in a cross-border market environment.
