## Chemistry : Polymer Sciences

Thakur, Vijay Kumar, Thakur, Manju Kumari (Eds.), Washington State University, Pullman, WA, USA

# Eco-friendly Polymer Nanocomposites

**Processing and Properties**

- Sole comprehensive book with detailed acquaintance on the evolving field of eco-friendly polymer nanocomposites
- Focuses on fundamentals of eco-friendly polymer nanocomposites such as their chemistry, composition, synthesis, properties and characterization
- Provides basic information and clear understanding of the present state and the growing utility of eco-friendly nanocomposites in different applications
- Includes contributions from world renowned experts on eco-friendly nanomaterials and discusses the combination of different kinds of materials procured from renewable resources/ green techniques

This book contains precisely referenced chapters, emphasizing environment-friendly polymer nanocomposites with basic fundamentals, practicality and alternatives to traditional nanocomposites through detailed reviews of different environmental friendly materials procured from different resources, their synthesis and applications using alternative green approaches. The book aims at explaining basics of eco-friendly polymer nanocomposites from different natural resources and their chemistry along with practical applications which present a future direction in the biomedical, pharmaceutical and automotive industry. The book attempts to present emerging economic and environmentally friendly polymer nanocomposites that are free from side effects studied in the traditional nanocomposites. This book is the outcome of contributions by many experts in the field from different disciplines, with various backgrounds and expertises. This book will appeal to researchers as well as students from different disciplines. The content includes industrial applications and will fill the gap between the research works in laboratory to practical applications in related industries.
