Freedman, Bill (Ed.)

# Global Environmental Change

- Provides an up-to-date and authoritative resource pertaining to the scientific and socioeconomic dimensions of climate change, its anthropogenic influences, and the likely causes and consequences of predicted warming and other dynamics
- Aims to provide a benchmark for the present state of both knowledge and uncertainty
- Entries by highly qualified and well-recognized practitioners in their fields of expertise within the highly interdisciplinary subject areas of global environmental change

The handbook *Global Environmental Change* is intended to serve as a reliable and comprehensive resource to attend the needs of researchers, teachers, students, and professionals working in science and policy aspects relevant to environment and sustainability. Entries in the handbook are arranged by major section, and are extensively cross-referenced to allow users to find related titles in a user-friendly way. The handbook is available as a printed volume and as an on-line reference work.
