ISFRAM 2015

Proceedings of the International Symposium on Flood Research and Management 2015

- Provides state-of-the-art information on flood research and management
- Presents recent findings from experts in the field
- Introduces innovative research developments in water resources and flood-structure engineering

This book focuses on international research in flood-related areas and sustainable management. It consists of a compilation of innovative works, demonstrating best practices in flood management and recommend flood solutions. The selected papers cover the fundamentals and latest advances in the area, complete with illustrations, diagrams and tables. These proceedings serve as a source of information and state-of-the-art technology in managing floods to improve quality of life.
