# Transactions on Engineering Technologies

World Congress on Engineering and Computer Science 2017

- Contains revised and extended research articles written by prominent researchers participating in the conference
- Describes some state-of-the-art contributions in engineering technologies, the physical sciences and industrial applications
- Provides a useful snapshot of these fields for researchers and graduate students

This volume contains a selection of revised and extended research articles written by prominent researchers participating in a large international conference on Advances in Engineering Technologies and Physical Science which was held in San Francisco, California, USA, October 25-27, 2017. Topics covered include engineering mathematics, electrical engineering, communications systems, computer science, chemical engineering, systems engineering, manufacturing engineering, and industrial applications. With contributions carefully chosen to represent the most cutting-edge research presented during the conference, the book contains some of the state-of-the-art in engineering technologies and the physical sciences and their applications, and serves as a useful reference for researchers and graduate students working in these fields.
