Soft Computing and Signal Processing

Proceedings of ICSCSP 2018, Volume 1

- Provides information on a wide set of topics in soft computing and signal processing
- Is useful for academicians as well as researchers looking for current developments and future trends
- Contributes to the dissemination of the latest research and innovations

The book presents selected research papers on current developments in the field of soft computing and signal processing from the International Conference on Soft Computing and Signal Processing (ICSCSP 2018). It includes papers on current topics such as soft sets, rough sets, fuzzy logic, neural networks, genetic algorithms and machine learning, discussing various aspects of these topics, like technological, product implementation, contemporary research as well as application issues.
