# New Treatment Modalities in Rectal Cancer

- Chapters provide insight into pathological and immunological aspects of rectal cancer
- Describes modern surgical aspects of management of rectal cancer with the help of illustrations
- Discusses natural orifice transluminal endoscopic surgery and enhanced recovery
- Includes chapter on molecular evaluation of the tumor

This book provides an up-to-date and detailed overview of diagnostic and management strategies for rectal cancer. It includes chapters focusing on recent diagnostic modalities such as technical advances, the role of magnetic resonance imaging (MRI), immunology, and histopathology, as well as the latest surgical techniques for the management of rectal cancer. It also discusses the role of adjuvant, neo-adjuvant and non-operative approaches. Further, it presents the recent guidelines of prevention and early diagnosis, as well as current and future diagnostic and staging work-up, clearly and concisely, linking each topic to the therapeutic options arising from the staging. A large part of this multifaceted book is devoted to the in-hospital care of rectal cancer patients, from the fast-track procedures and enhanced recovery systems to detailed descriptions of the available surgical techniques, including salvage situations, accidents, complications and their treatment.
