# Advances in Engineering Design and Simulation

Select Proceedings of NIRC 2018

Series: Lecture Notes on Multidisciplinary Industrial Engineering

- Presents select papers from NAFEMS India Regional Conference on Engineering Design and Simulation
- Highlights the use of finite element method and computational fluid dynamics for analyses and design of complex systems
- Discusses case studies in aerospace, automotive, foundry, machine tooling and several other engineering domains

This book consists of selected peer-reviewed papers presented at the NAFEMS India Regional Conference (NIRC 2018). It covers current topics related to advances in computer aided design and manufacturing. The book focuses on the latest developments in engineering modelling and simulation, and its application to various complex engineering systems. Finite element method / finite element analysis, computational fluid dynamics, and additive manufacturing are some of the key topics covered in this book. The book aims to provide a better understanding of contemporary product design and analyses, and hence will be useful for researchers, academicians, and professionals.
