Recent Trends in Mechanical Engineering

Select Proceedings of ICOFTIME 2020

Series: Lecture Notes in Mechanical Engineering

- Focuses on emerging techniques in additive and smart manufacturing
- Offers latest applications of robotics and automation in industrial processes
- Includes studies on energy-efficient and eco-friendly materials for energy

This book presents the select peer-reviewed proceedings of the International Conference on Futuristic Trends in Mechanical Engineering (ICOFTIME 2020). The contents focus on latest research in different areas of mechanical engineering such as additive manufacturing, vibrations, robotics and automation, nano and smart materials, green energy, supply chain management, aviation, and biomechanics. The book also includes numerical and optimization methods relevant for several real-life mechanical engineering problems. Given its contents, this book will prove useful for researchers and professionals alike.
