Advances in Hydroinformatics

SIMHYDRO 2014

Series: Springer Water

- Presents a collection of extended papers from the SIMHYDRO 2014 conference
- Describes the state-of-the-art in the modeling and simulation of fast hydraulic transients
- Written by leading experts in the field

This book is a collection of extended papers based on presentations given during the SIMHYDRO 2014 conference, held in Sophia Antipolis in June 2014. It focuses on the modeling and simulation of fast hydraulic transients, on 3D modeling, and on uncertainties and multiphase flows. The book explores both the limitations and performance of current models and presents the latest developments based on new numerical schemes, high-performance computing, multiphysics and multiscale methods, and better interaction with field or scale model data. It addresses the interests of practitioners, stakeholders, researchers and engineers active in this field.
