Takashi Inoguchi, Lien Thi Quynh Le

The Development of Global Legislative Politics

Rousseau and Locke Writ Global

Series: Trust

- Provides insights into multilateral treaties formulated as global social contract and global quasi-legislative behavior
- Puts multilateral treaties in context, through Rousseau and Locke Writ Global
- Presents evidence-based anatomy of multilateral treaties as the Theory of Global Legislative Politics

This book is the first systematic scientific study of global quasi-legislation. Taking public opinion and multilateral agreements as the international equivalent to national election and passing laws on the national scale, and extending nation-state concepts to a global society, it analyzes citizens' preferences and the state's willingness to enter into 120 multilateral treaties. After identifying the links as a first step toward conceptualizing quasi-legislative global politics, the book examines how each of the 193 states manifests quasi-legislative behavior by factor-analyzing six instrumental variables such as treaty participation index and six policy domains of multilateral treaties, including peace and trade. It then discusses global change between 1989 and 2008, and conceptually and empirically examines the three theories of global politics that originated during that period: the theory of power transition, theory of civilizational clash and theory of global legislative politics. Lastly, it proposes a theory of global legislative politics. Shedding fresh light on the transformative nature of multilateral treaties, this book attracts researchers and students in political philosophy, international law and international relations as well as practitioners and journalists. Inoguchi and Le have developed a genuinely original perspective on world politics, one that opens up a new research agenda for thinking about state and global actors simultaneously. -- Anne-Marie Slaughter, Bert G.
